# Sherpa Demo Environment

## *Usage and Install Guide*

### Usage

The Sherpa demo site provided by Active Commerce may be used for evaluation, demonstration, and training purposes only. At no time may it be installed in a manner which allows access by anyone other than the Active Commerce partner to which it has been provided, the partner's customers, and the partner's prospective customers.

### Installation Instructions

- Install Sitecore, DMS, and Active Commerce per the instructions found in the *Active Commerce Installation and Developer Quick Start* documentation.
  - a. Skip Step #5, "Modify Web.config," as the Sherpa package comes with a modified Web.config already.
- Under App\_Config\Include, rename DataFolder.config.example to DataFolder.config. Edit the file to specify the correct installation path for your Sitecore data folder.
  - a. e.g. c:\inetpub\wwwroot\Sherpa\data\
- Install the following Active Commerce plugins:
  - a. UPS
  - b. USPS
- Install the Sherpa Demo package provided by your Active Commerce representative.
- Using the Sitecore workbox, ensure all Active Commerce items have been approved in the *Active Commerce Workflow*.
- Perform a full site Smart Publish.
- From the Control Panel or Sitecore Rocks, rebuild the Link Database on *master* and *web*.
- From the Developer Ribbon or Sitecore Rocks, rebuild all search indexes.
- Adjust site definition in xActiveCommerce.Sites.config and IIS bindings as needed to expose the Sherpa site on the desired host name.
- To demonstrate VIP pricing, create an extranet\SherpaVIP role, and assign a customer account to the role.
- To enable order receipts and other emails, configure the Sitecore *MailServer* setting in Web.config or in an include file.
